Experience

MIS-IT Analyst and Programmer

Forever Flawless Face and Body Center Inc.

2024 - Present

- Resolved various UI bugs on the website, ensuring a seamless user experience
- Regularly updated the website to reflect current promotions and client requests
- Gained proficiency in Shopify, including adding, updating, and deleting products
- Utilized cPanel, HTML, CSS, and PHP for website management and maintenance

Internship - Junior Software Developer

Jan - May 2024

Itemcount.io

- Mentored in essential DevOps tools including Docker, Kafka, Temporal, and Redis, showcasing adaptability and eagerness for new technologies
- Extensive experience in front-end development, including creating and optimizing landing pages to enhance user engagement
- Proficient in bug fixing, ensuring smooth functionality and user experience across web applications
- Having intermediate experience in Next.js and Nest.js integration for full-stack TypeScript apps, utilizing MongoDB for storage and GraphQL for queries

Project

Full Stack Developer

Church Ministry Website Platform

2024 - Present

- Developed and launched the Grace Presbyterian Church website to connect and engage the community, offering essential resources
- Integrated Donorbox for seamless online donations, supporting contributions from church members and visitors.
- Managed the church's GoDaddy domain, setting up email and DNS for a professional web presence.
- Deployed the website on Netlify, ensuring fast, reliable hosting with continuous deployment for easy updates.

Full Stack Developer

Reservation System

May - Nov 2024

- Developed a room reservation system for Flawless head office, simplifying the process of booking meeting rooms for employees.
- Integrated Node.js and MongoDB for backend functionality, enabling real-time booking management.
- Created an admin panel to allow administrators to efficiently manage reservations, accept or deny requests, and improve operational efficiency.
- Implemented a user-facing feature that allows clients to view other users' reservations, promoting transparency and helping employees plan accordingly.

Capstone Project - Front End Developer

Bulacan State University - Hagonoy Campus

2023-2024

- Developed a smart plastic bottle bin to promote recycling on campus, rewarding students with tokens for each bottle deposited, convertible into recitation grades at the professor's discretion.
- Integrated IoT sensors to monitor the bin's fill level and ensure the bin only accepts plastic bottles, functioning as a reverse vending machine.
- Designed an admin panel with the ability to track and manage the bin's level and status, enabling efficient bin usage and maintenance.
- Utilized Node.js and MongoDB for backend services, managing bottle deposits, token rewards, and tracking the system's data.

Education

Bachelor of Science in Information Technology Major in Web and Mobile Application Development

Bulacan State University - Hagonoy Campus

2020 - 2024

- Best in Capstone and Consistent Dean's Lister
