About Me

AI-Native Full-Stack Web Developer with 2 years of experience building internal web applications, dashboards, and business systems. Skilled in full-stack development, system architecture, database design, and AI-assisted software engineering, leveraging tools like Claude Code, Code to accelerate development, solve complex problems, and deliver production-ready solutions.

Work Experience

Jr. Programmer | Fisherfarms Inc.

April 2025 – May 2026

- Designed and developed internal web applications to support operational monitoring and reporting
- Built and maintained database structures and backend workflows to ensure reliable system performance

MSIT Analyst & Programmer | Flawless Face & Body Center, Inc.

April 2024 – Mar 2025

- Maintained and updated the company's e-commerce website using WordPress and Shopify, gaining hands-on experience in product and content management
- Supported data management and reporting needs by maintaining product and operational information within the system

Project

Full Stack Developer | BlueSky Container Tracking System

May – June 2026

- Built an enterprise internal logistics platform to automate daily container tracking
- Integrated third-party shipping APIs and implemented automated synchronization
- Developed real-time dashboards, KPI analytics, interactive maps, and detailed shipment tracking interfaces.

Education

BSIT Major in Web and Mobile Application Development | Bulacan State University – Hagonoy Campus

2020 – 2024

- Best in Capstone and Consistent Dean's Lister
